

Our Products

We have developed a range of high quality products for use by professionals in the trade.

Easy to use with minimal labour time needed, these products will get to work whilst you work on other jobs, saving you time and increasing your profit margins.

We want our products to be the best on the market so your customers are more likely to feel the difference they make to the performance or cleanliness of their vehicle.

However, "the best" doesn't mean "the most expensive" – our products represent great value for money, especially when you get to experience how committed we are to growing your business.

Our core product range is presented below – please see the individual product sheets for more detailed information.

ACP PROFLUSH Oil System Cleaner

PROFLUSH is a powerful engine cleaner that works more quickly and lasts longer than other motor flushes on the market, meaning the results are more noticeable for you and your customers.

ACP PROFUEL Diesel System Cleaner

PROFUEL Diesel System Cleaner is the only product on the market to combine deep cleaning power with antibacterial agents that destroy the "diesel bug" bacteria that build up and block the fuel system.

ACP PROFUEL Petrol System Cleaner

PROFUEL Petrol System Cleaner removes the harmful residues, varnishes and deposits that many other fuel treatments leave behind. Deep cleaning power means less emissions and better fuel economy for your customers.

ACP PROAIR Aircon System Cleaner

PROAIR kills the germs that live in the cabin and air con system, removing lingering odors and leaving your customer's car smelling like new.

We also offer a range of gaiters, penetrating oils, lubricants, grease and other cleaning products... *just ask our customer services team for details.*
