

ACP PROFUEL DIESEL SYSTEM CLEANER

ACP PROFUEL DIESEL SYSTEM CLEANER

is a unique blend of cleaning agents, lubricants and antibacterial agents that quickly and efficiently cleans the entire fuel system.

What does it do?

- Removes harmful gums and varnishes, carbon and vanadium deposits
- Combats corrosion caused by acids and controls fuel oxidation
- Unblocks injectors and restores spray patterns
- Extends the life of fuel pumps
- Destroys bacteria that builds up and can block the fuel system

What benefits will customers notice?

- Improved cold starting
- Reduced exhaust smoke and emissions
- Less sulphurous smells
- Better fuel economy
- Smoother running with reduction of flat spots

No other product on the market combats the “Diesel Bug”

The Problem

Figure 1

High contamination of diesel bug in the fuel

The Result

Figure 2

Fuel after treatment showing no bugs remaining

Diesel was tested using Shield Automotive’s diesel bug testing kit. **Figure 1** shows a large number of bugs present in the diesel. The fuel was then treated with ProFuel Diesel System Cleaner. After 10 days the diesel was tested again. **Figure 2** shows that there are no bugs remaining in the fuel after treatment.
